

2010 MAJOR CHANGES

Please Note: The 13 & Under Club Division has been CANCELLED due to low registration!

Chaperones

Chaperones are not required to check in. This new policy is under review for the 2010 BJNC. If it is deemed that the policy is being abused through misrepresentation or discovery that designated chaperones are not actually present in the championship city, USAV will revert to its original Chaperone policies and requirements for 2011.

The Event Arbitrators, USAV Staff and Championship Committee reserve the right to conduct random and periodical ID checks during the tournament. If a team is discovered to have falsified a chaperone form, copy of the ID, misrepresented their chaperone, or is found to be without the designated chaperone in the championship city, sanctions will be placed against the team, its coaches, and its club director. Sanctions include immediate disqualification of the team from the tournament as well as possible suspension from next year's National Championships and penalties against the Club.

Medical Release Forms

Player medical release forms are no longer required to be turned in to USA Volleyball. At your designated team check-in you will be required to show a copy of the forms to the registration staff who will verify that each player listed on the roster has a form and then return the copies to the coach/team representative. The coach/team representative will be required to keep the forms with them at all times during the tournament.

It is highly recommended that two copies of the medical release form be with the team—one with the coach and one with the chaperone. Should a player be injured a copy will need to be provided to the trainer.
