

How to install UAR on Blackberry

1. Using your phone browser, go to www.ua2u.net.
2. Click on "Blackberry".
3. Follow download links.
4. The first time you go into the app, you will be prompted for your login (your web login). If you are not prompted, go to Update&Backup > Login.
5. Now go to Update&Backup > Download/Change tournament.
6. Select your tournament. Pull up your menu and select "download and activate". If you have purchased the tournament online already, you will be automatically updated.
7. If you have not purchased the tournament package, see the UA desk at the event to pay and be activated.
8. If you need your recruits from the web, go to Update&Backup > Download recruits from server. You have two filters on this page: "Show ranks since..." and "Number of Notes...". Fill those in, pull up menu, and "Download".
9. During an event, you will go to Update&Backup > Refresh current roster/schedule to update the tournament.
