

How to install University Athlete Recruiter (UAR) to your Palm OS device

METHOD 1: Via wireless

1. Using your phone browser, go to www.ua2u.net.
2. Tap "Palm".
3. Tap "UAR Update App".
4. Save to Device.
5. Open and run. You have only installed the app, not the tournament information. Go to the web update page. Select the correct event from the menu in the top right hand corner.
6. Tap and download anything in BOLD (roster, schedule, etc).
7. To get your recruits, tap and download Prefs/Purchases.

METHOD 2: At an event

1. Put your memory card in the card reader at the UA update desk/station.
2. Wait for the green screen.
3. Tap "synchronize".
4. If it asks for activation, hand your device to the person working the UA desk.
5. You'll only need to activate once. When you need updates, just do steps 1-3 above.
6. If you put your card into your Palm, and the Palm resets: take the card out, wait for Palm to reboot, and insert card again. Make sure you get to the Synchronize screen.
