

How to install UAR on webOS (Pre, Pixi)

1. The Palm Pre/Pixi runs on an operating system called webOS. You MUST install Classic by using the webOS "App Store", searching for "Classic", and downloading from the store. You cannot install from any website. Classic will allow you to run Palm OS applications. Information here:

<http://www.motionapps.com/classic/overview/>

2. Now, you need to install UAR.

Via wireless.

- 1) If you have Classic running, exit now.
- 2) Using your phone browser, go to www.ua2u.net.
- 3) Tap "Palm."
- 4) Tap "UAR Update App", wait for that to download.
- 5) Now open Classic.
- 6) Switch app launcher category pull down (top right) to "Virtual Card".
- 7) Launch UAR 2010.
- 8) If you installed via wireless, you'll need to go to the web update page, check for updates, and download your preferences.
